

Offshore Safety

since 1590

Offshore Safety means no compromise on quality.

Test Bench Service at Ramnäs

If you have a component which needs to be proof- and/or break loaded, pulled to actual break or any similar test we now provide this service in Ramnäs, Sweden.

Our strength is that we can perform the tests on short notice and we also have professional and competent personnel handling the tests.

We have a good collaboration with all the major classification societies who can also attend on short notice.

After the pull test, if needed, we can also provide NDT testing of your components such as Magnetic Particle Examination and Ultra Sonic testing.

Facts about the Test Bench Measurements

Total: 12m (39.4') long, 1.1m (3.6') wide and 0.6m (2') deep.

Deeper part: 3m (9.8') long, 1.1m (3.6') wide and 1m (3.3') deep.

Capacity

The test bench has a maximum capacity of 21 500kN (2 190 mtons).

Connecting components

We have several ways of connecting your components.

If we do not have the tools at hand we have a workshop inhouse which can design and manufacture them.

Some of our reference customers:

Moorlink, Sweden

StatoilHydro, Norway

Parker Scanrope, Norway

APL, Norway

"Some of the advantages we find with Ramnäs Test Bench Service are that it is quick and easy to get the tests done. They have skilled operators handling the test bench and they can handle and solve all our requirements for the different components we test"

Says Andreas Odenman,
Project Manager at Moorlink, Gothenburg.

Offshore Safety

since 1590

Offshore Safety means no compromise on quality.

Offshore Safety

Ramnäs Bruk provides offshore safety through high quality anchor chain for demanding mooring systems to customers in the offshore industry. With 40 years of experience working in the offshore sector, Ramnäs has been producing chains since 1876 in Ramnäs, Sweden.

Our quality chain begins in the steelworks that manufacture and supply the highgrade steel we require. It is here we have developed the alloys and characteristics, based on decades of experiences, for all our chains including the new grade 5 chains.

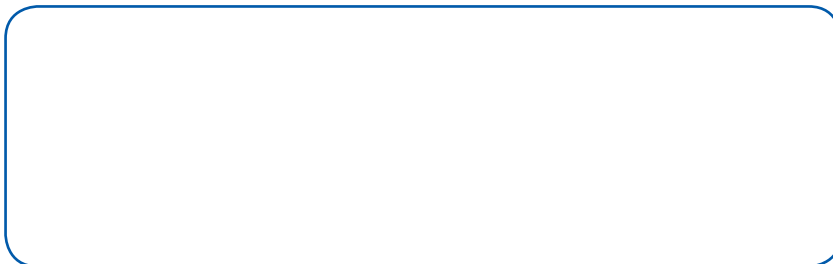

Quality Warranty

Quality is a way of life

It applies to all of us who work at Ramnäs. And that is the way it has always been. We know how important our products are for our customers. We know there are no margins for compromise.

Ramnäs Bruk is a leading manufacturer of quality chains and we at Ramnäs believe in our excellent product quality and we have 5 Year Quality Warranty on all our chains.
