The main objective of our Quality Policy is that Ramnäs Bruk provides offshore safety through high quality anchor chain and accessories for demanding mooring systems to customers in the offshore industry.

Besides satisfying the formal requirements of the customer, we also aim at being the customers' first choice for service and consistency of deliveries.

We must also perform a systematic development-work in order to improve our procedures and to become more efficient.

In order to safeguard a systematic way of work, Ramnäs Bruk AB has an Activity System, which satisfies the requirements of ISO 9001:2008 and is also subject to continuous monitoring and improvement.

The Activity System should serve as support for the whole company and must be applied by all employees of the company.
